

INSTRUCTIONS:

Attn: All George Orwell fans, BIG BROTHER requires the following warning:

Infants have suffocated on inflatable mattresses. Never place infants aged 0-18 months to sleep on this inflatable mattress. Infants can suffocate on an under inflated or deflated mattress, on the bedding, by co-sleeping with another child, and by entrapment between the mattress and bed frame or between the mattress and a vertical surface. Provide at least 12 inches of space between mattress and all walls/dressers/vertical objects to avoid entrapment. Always keep mattress fully inflated when in use.

The following instructions are from hiccapop:

CAUTION: While we've used the thickest vinyl of any inflatable bed on the market, it is still vinyl. So when inflating it, please try to avoid sharp objects like scissors, knives, machetes, etc., as they could cause some serious damage to our beautiful vinyl. BUT...in the unlikely event of a small puncture, we've enclosed a patch kit to get you back up and running.

Abridged instructions: Lay out, blow up, sleep!

As for the more detailed instructions, everyone knows they always get lost. So we've printed them right on the bed itself (in a BIG font for easy reading).

#hiccahint: While our mattress fits all standard crib sheets, a sleeping bag is always a fun and hassle-free choice for the kids.

Enjoy!

Peace, Love, hiccapop
